Counter Application

A simple, interactive web application that allows users to increment, decrement, and reset a counter. This project is designed to demonstrate basic web development concepts using.

HTML,

CSS

JavaScript

Features

Increment Counter: Add to the counter value.

Decrement Counter: Subtract from the counter value.

Reset Counter: Reset the counter to its default value (e.g., 0).

Responsive Design: Works seamlessly across devices of various screen sizes.

Real-Time Updates: Counter value updates dynamically without refreshing the page. Technologies Used

1. **HTML**: For structuring the web page.

2. **CSS**: For styling and layout of the application.

3. **JavaScript**: For implementing interactive functionality and event handling.

How to Use 1. Clone or download the repository to your local machine:

bash git clone https://github.com/Vatsalasingh17/Counter_Application.git
